Yazoh Connector for CS-Cart

Setup guide: install, connect, sync and start asking your store questions. Takes a few minutes.

What you get

Feature	What it does
Yazoh Copilot (admin panel)	Ask questions about your store in plain language, for example "How many orders did I receive this month?"
Store Health score	One score for your store, with a ranked list of what to fix first.
Shop Assistant (optional)	A chat assistant for your shoppers on the storefront: product questions and order status.
Read-only	Yazoh never changes your products, prices, orders or customers.

Before you start

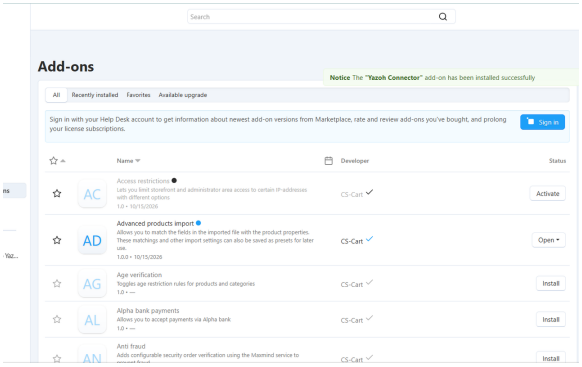

You need admin access to your CS-Cart store and an email address for your Yazoh account. No license key or API key is needed. The first 7 days are free with no credit card; the connection itself does not require one.

Setup in 5 steps

Step 1

Install the add-on

In the CS-Cart admin panel go to **Add-ons > Downloaded add-ons**, click the gear icon, choose **Manual installation**, pick the file **yazoh_connector-1.2.0.zip** with **Local**, and click **Upload & install**. You will see: "The Yazoh Connector add-on has been installed successfully."

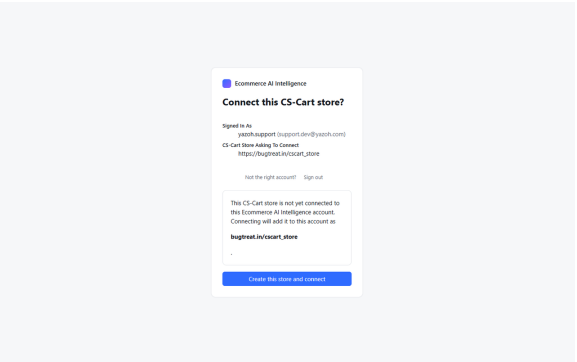

Add-on installed successfully.

Step 2

Connect to Yazoh

Open **Add-ons > Yazoh Connector** and click **Connect to Yazoh**. You are taken to Yazoh to sign in or create an account. Then confirm with **Create this store and connect**.

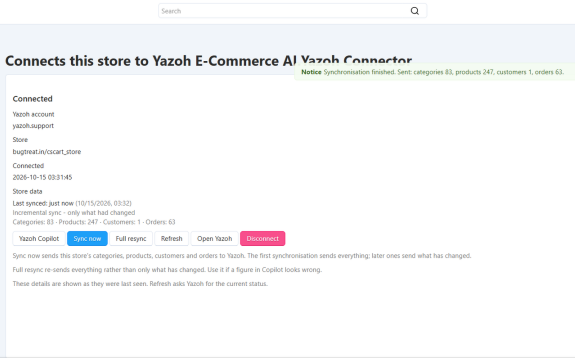

Confirm the store connection on yazoh.io.

Step 3

Sync your store data

Back in the admin panel, click **Sync now**. The first sync sends everything; later syncs send only what changed. You will see a message such as "Synchronisation finished. Sent: categories 83, products 247, customers 1, orders 63."

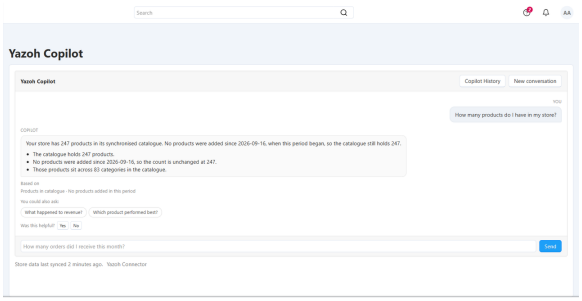

Connected store with the sync summary.

Step 4

Ask Yazoh Copilot

Open **Add-ons > Yazoh Copilot**, type a question and press **Send**. Answers come from the data your store has synchronised. Use **Copilot History** to see past conversations.

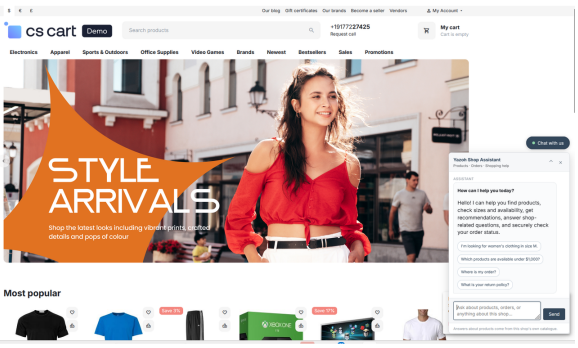

Copilot answer with suggested follow-up questions.

Step 5

Shop Assistant on your storefront (optional)

Shoppers can use the Yazoh Shop Assistant ("Chat with us") to find products, check availability and securely check an order's status.

Shop Assistant on the storefront.

Buttons on the Yazoh Connector page

Button	What it does
Sync now	Sends new and changed categories, products, customers and orders to Yazoh.
Full resync	Re-sends everything. Use it if a figure in Copilot looks wrong.
Refresh	Asks Yazoh for the current connection status.
Open Yazoh	Opens your Yazoh account in a new tab.
Disconnect	Disconnects this store from your Yazoh account.

What data is shared

To answer your questions, Yazoh reads and syncs your store's **categories, products, customers and orders** to your Yazoh account. Yazoh never changes anything in your store. For details, see the Privacy Policy at https://www.yazoh.io.

Pricing

7-day free trial, no credit card required. Paid plans are shown on https://www.yazoh.io. The Yazoh Connector add-on itself is free.

Troubleshooting

Problem	What to try
A number in Copilot looks wrong	Click **Full resync** on the Yazoh Connector page, then ask again.
Status shows "Not connected"	Click **Connect to Yazoh** and complete the sign-in and confirmation.
Data looks out of date	Click **Sync now**, then **Refresh**.
You want to stop sharing data	Click **Disconnect** on the Yazoh Connector page.
